CARRYING THE MESSAGE TO ISOLATED COMMUNITIES

Technology

What is the real challenge with carrying the message to facilities?

Why would anyone invite a problem
into their facility?

In EVERY interaction,
be the solution….NOT a problem

Technology Needs

- Medium
  - Zoom / MS Teams / WebEx / etc.
    - Can be run via app or browser-based.
- Internet Connectivity
- Equipment
  - Fixed or Mobile device capable of running medium.
  - Speakers capable of required sound level.
  - Microphone, Camera (optional).
  - TV and/or Projector (optional).

HIPPA Concerns and Solutions

- Healthcare workers are required to safeguard client PII.
- ALWAYS err on the side of caution.
- Face camera to the wall.
  - Clients who wish to participate can come around front.
- Turn off video.
- Mute microphone.
- Safety protocols.

Meeting Venues

- Meetings dedicated to a specific site.
- Site participation in outside meetings.
  - Institutions can listen in to speaker meetings.
  - Local meetings might be best, assuming clients will be attending local meeting upon program completion.
