Taking Meeting Listings from Ownership to *Responsibility*

Best Practices We at *Code for Recovery* Have Seen

Meeting listings are *super dooper*...

...but we **can** make them better!

- “Why isn’t *my* meeting listed?” (**Data problem**)
- Sing it now: “*One of these listings is not like the other.*” (**Duplicates**)
- I showed up, but the lights weren’t on. (**Stale/Not updated**)
- “Ummm, this meeting is no long active. Why is it in Meeting Guide?” (**Ghost**)
- “Just *exactly who* is reporting this meeting?” (**Identity**)
- Do we really have this many meetings still *temporarily closed*? (**Validation**)

Responsibility & Coordination

Geographical seams

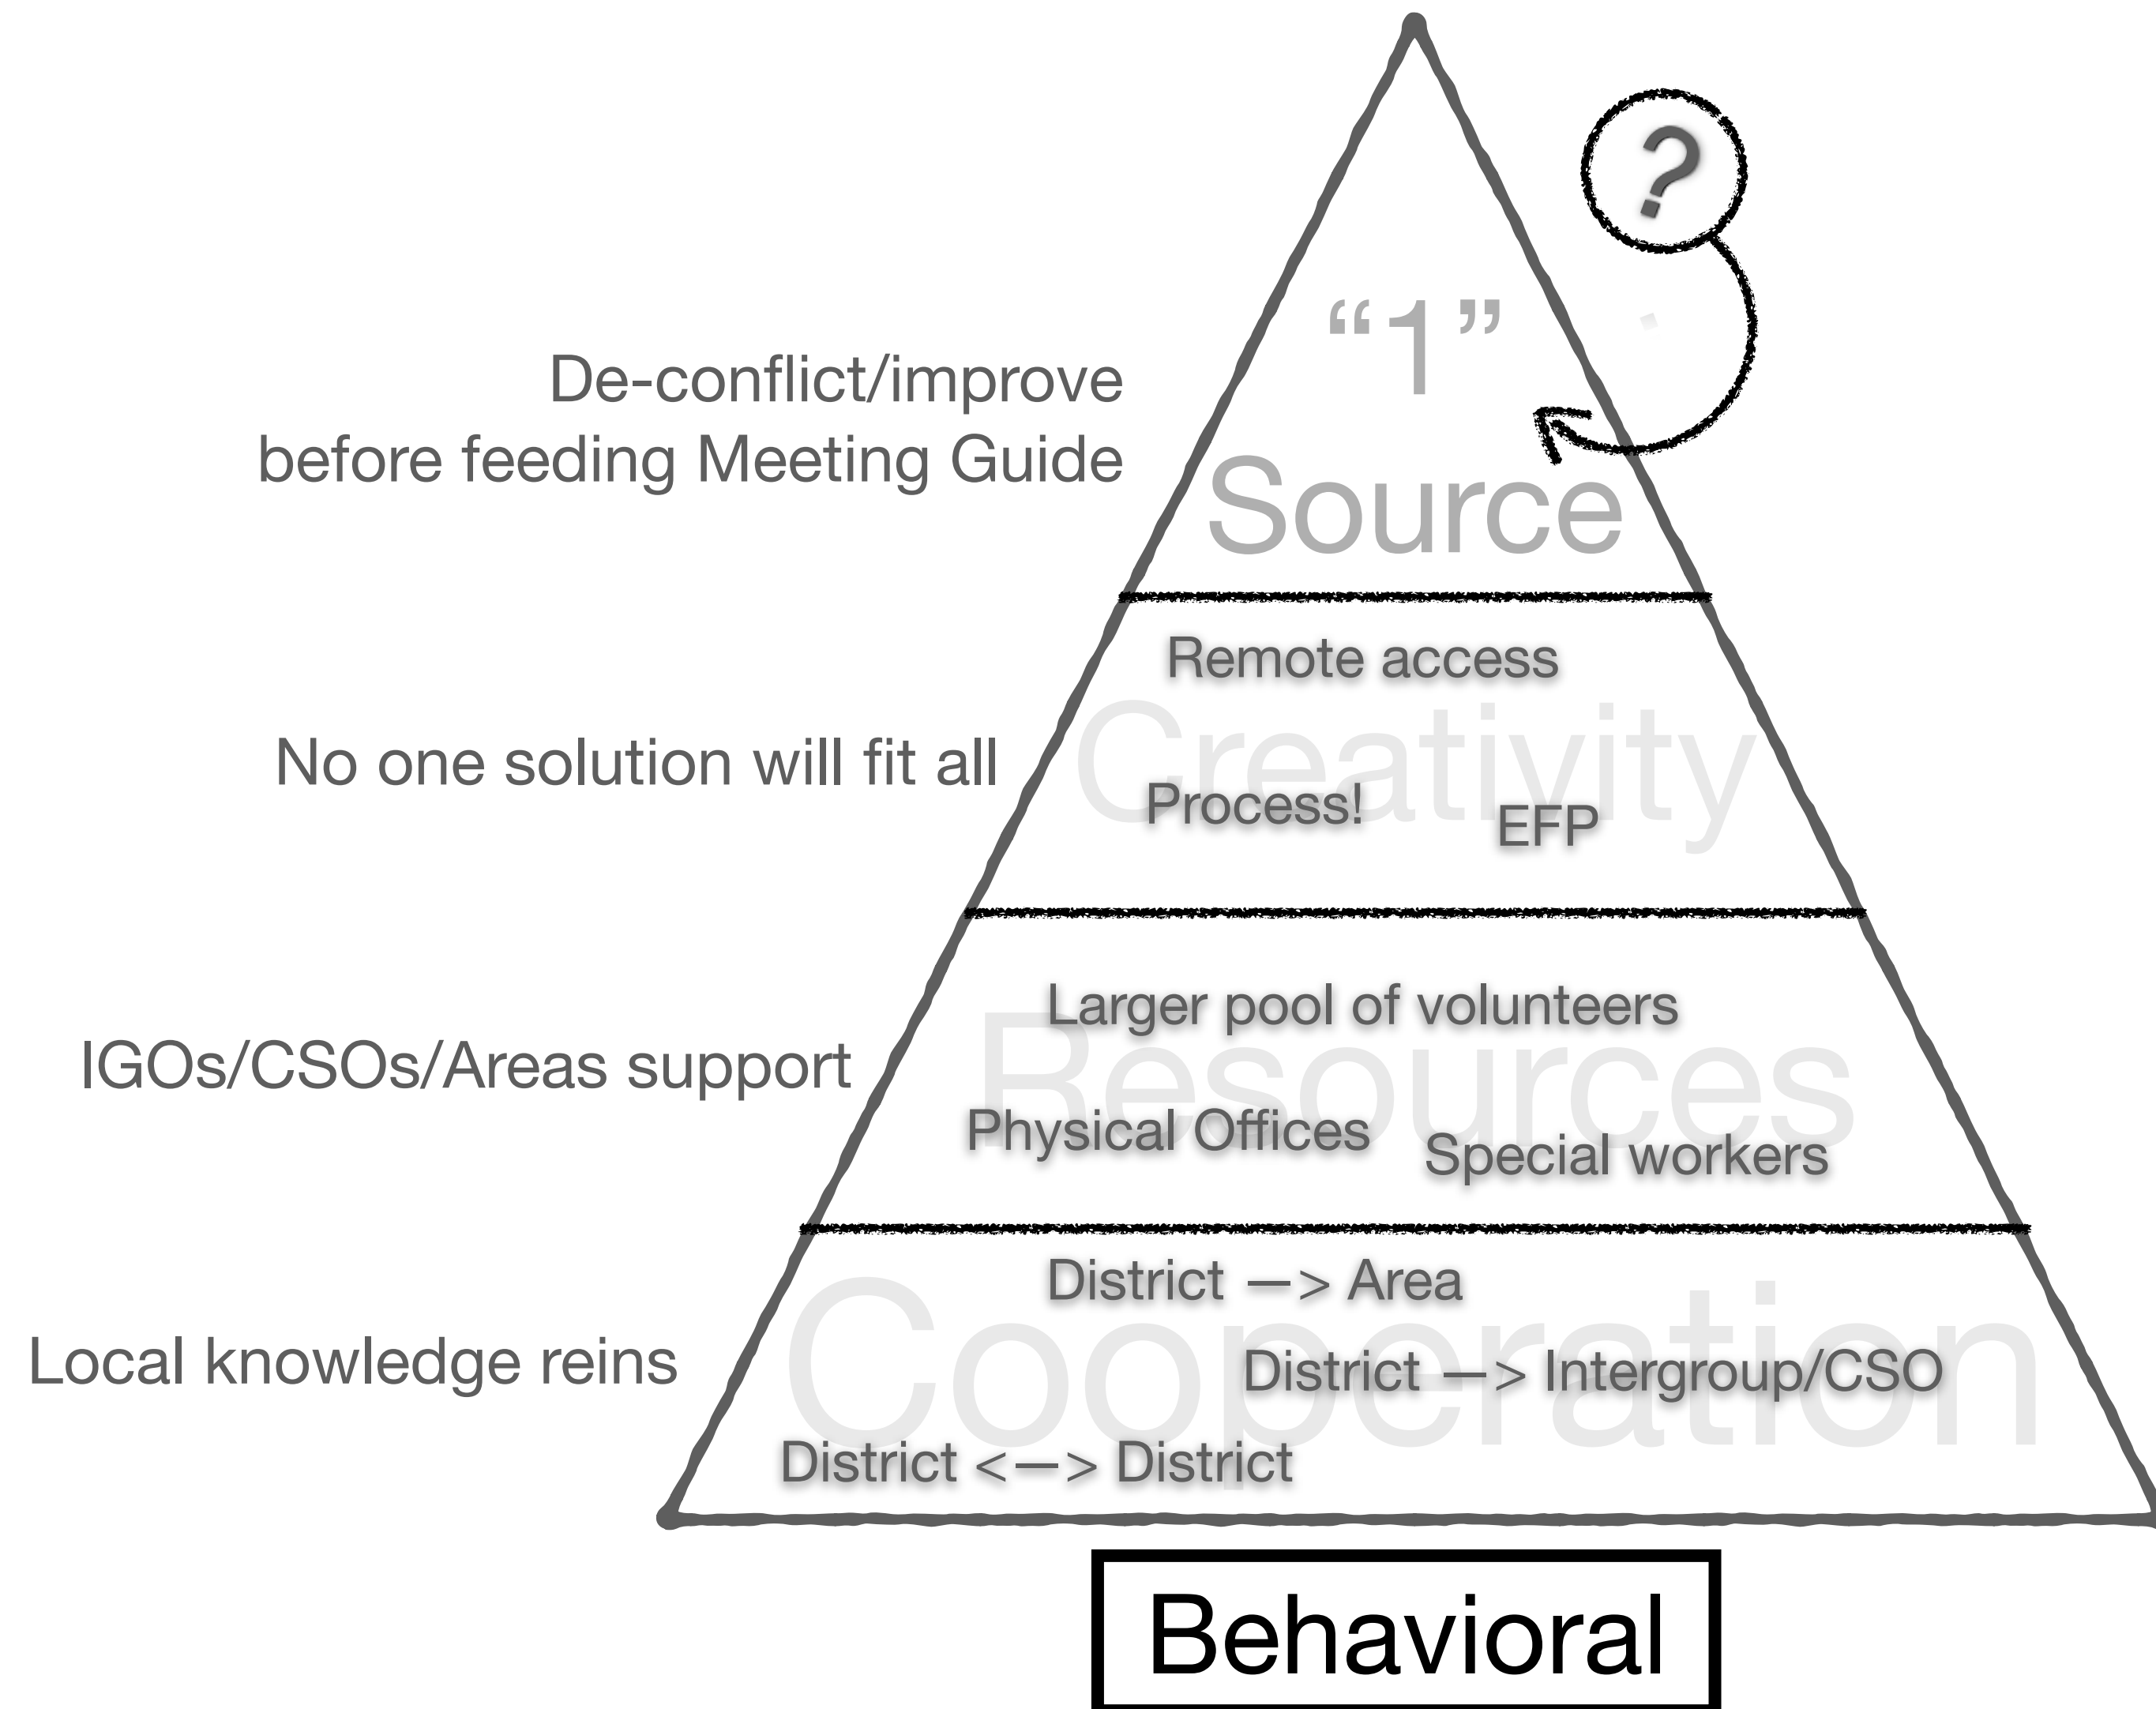

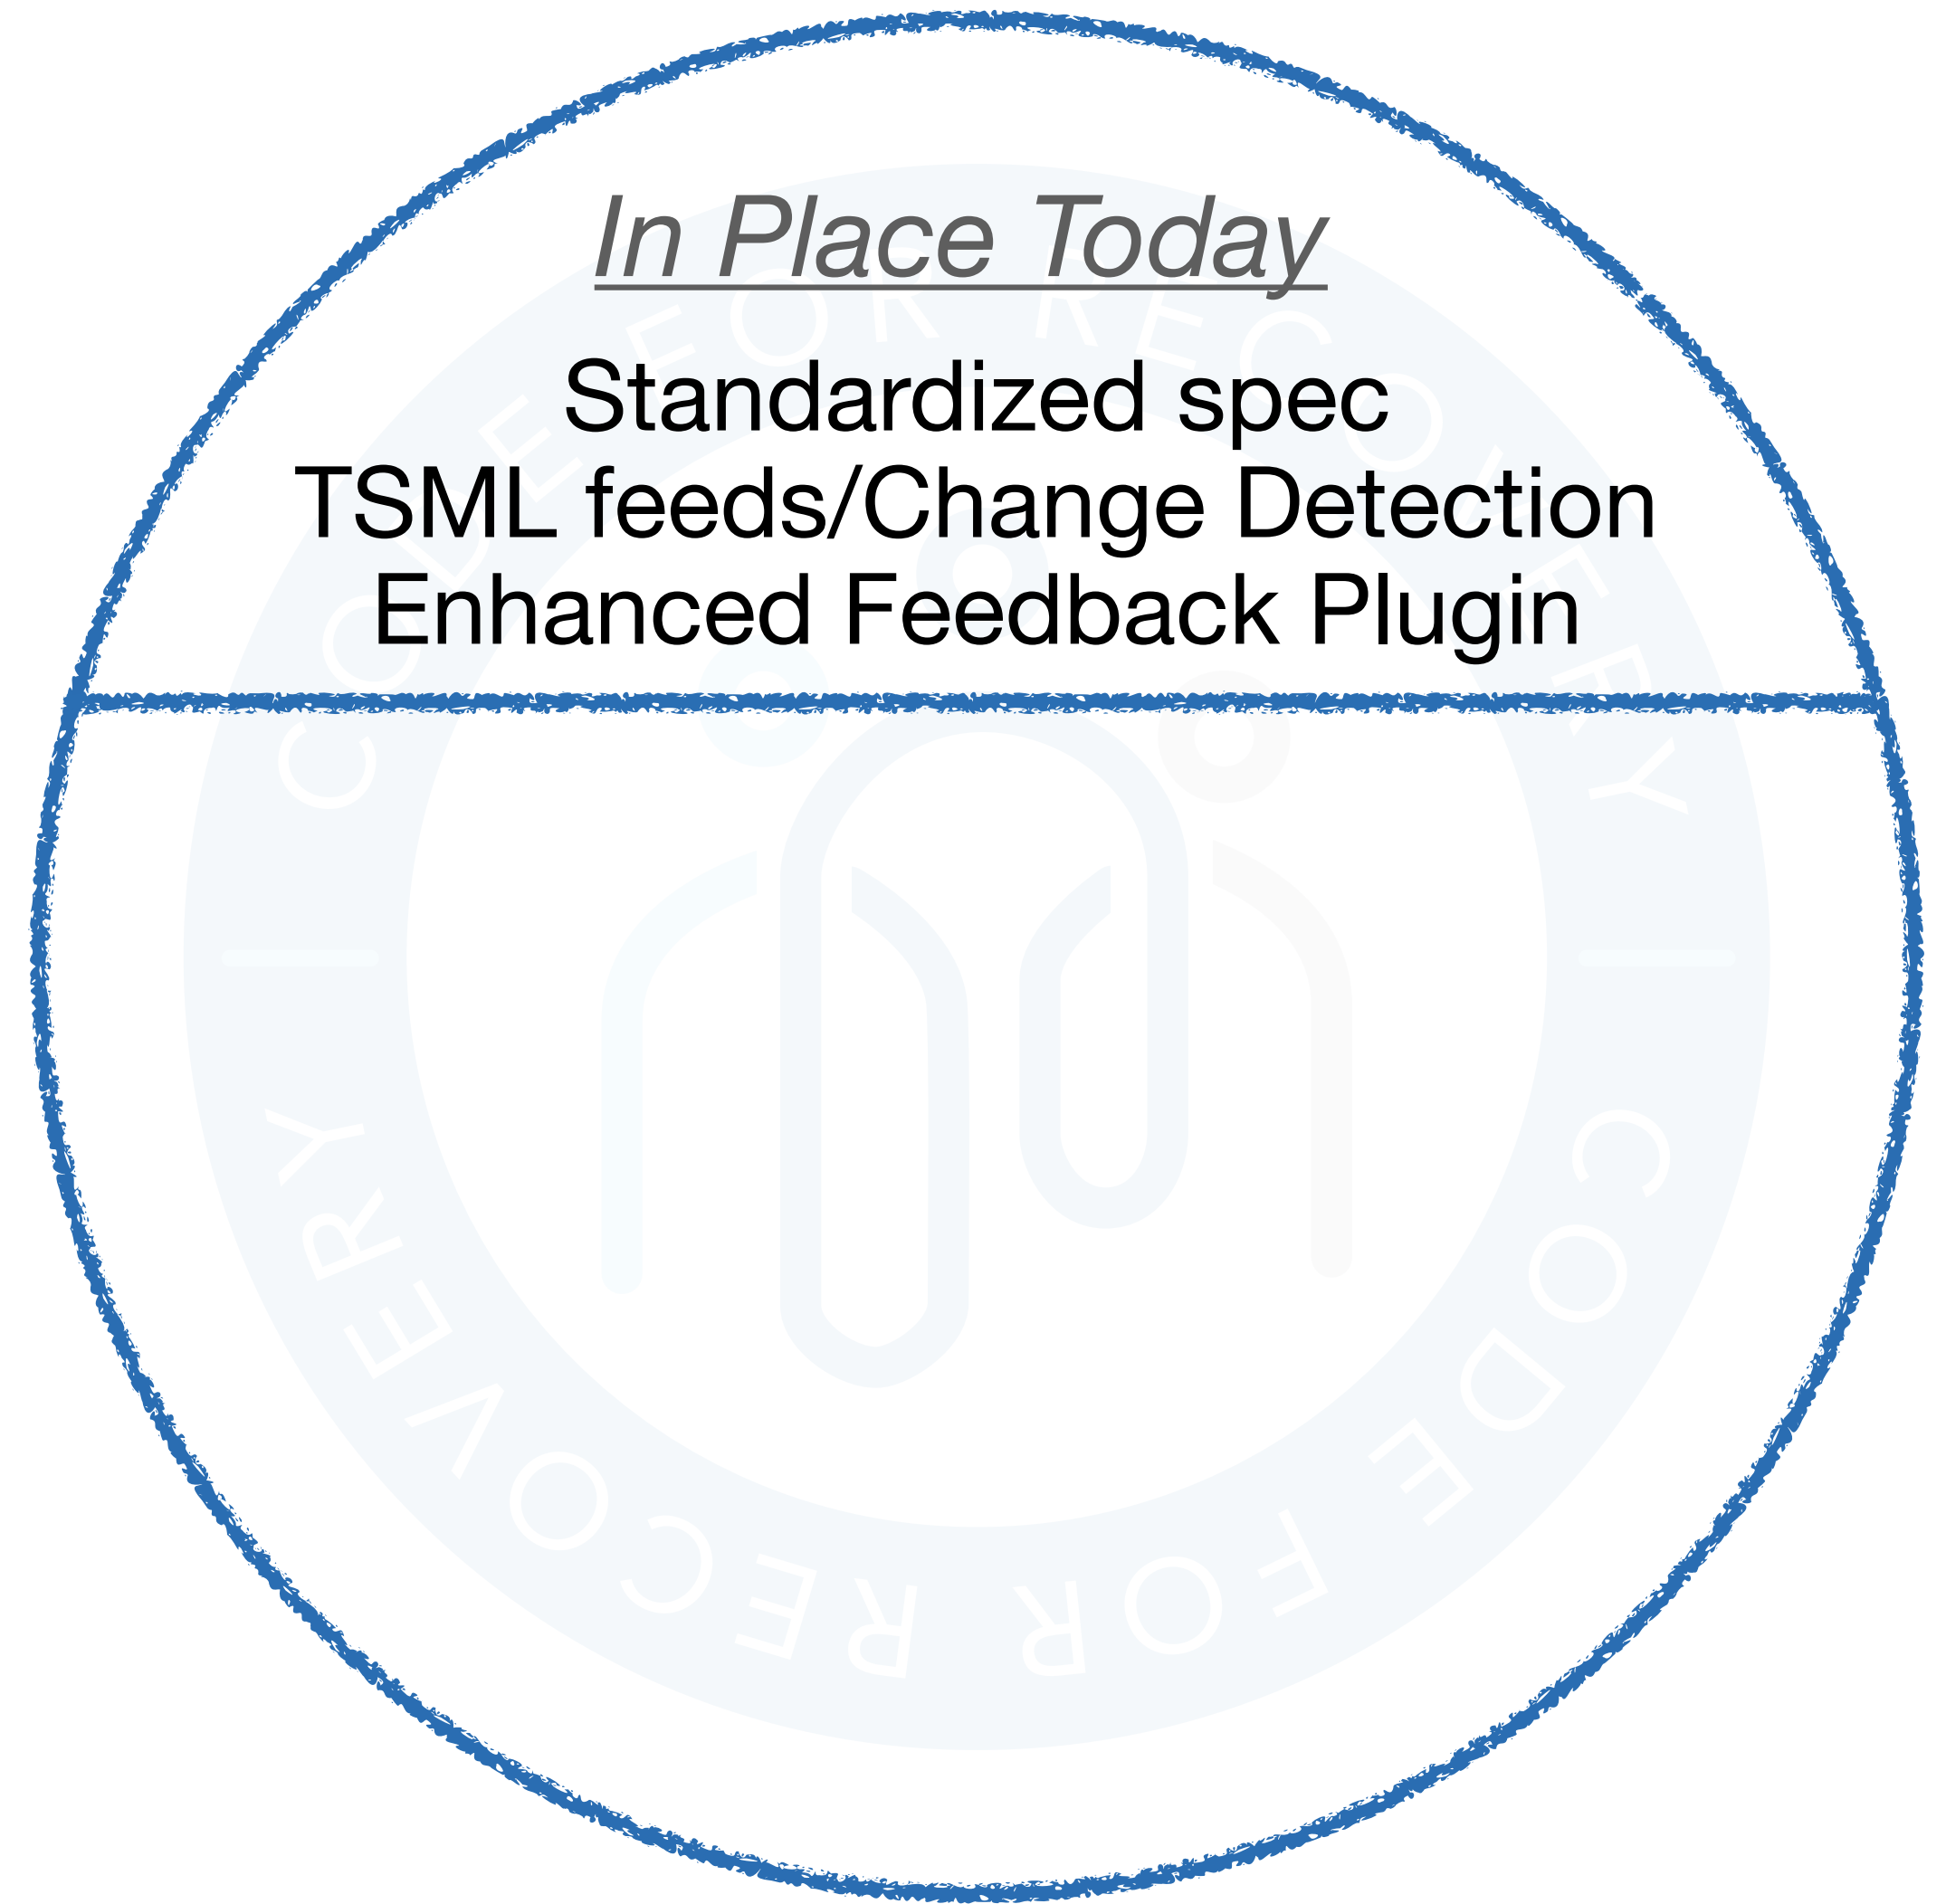

GSO-level Deduplication

locationMatches **=== true** ? **firstRegisteredReported** : duplicate

numberOfReporters **=== 1** ? **noDuplication** : duplicate

The Future?

Possible Technological Initiatives

- +/- in Meeting Guide/TSML
- Social scoring
- Improved Remote Access (TSML, by district)
- Frequency of updates (AI)
- Self-serve dashboard
